WHY TO USE 'T.T.' YARN?

- Low Count C.V.
- Low Hairiness
- Better Fabric Appearance
- Uniform dye pick-up, better lusture and low spirality
- Less Imperfections
- Low Classmate Faults
- Low Contamination
- Own ginned cotton
- Use Shankar Cotton

T.T. YARN IS IDEAL FOR ALL TYPES OF KNITTED AND WOVEN FABRICS

Our yarn is OEKO-Tex certified and is made from best available raw material. The mills are geared for 100% cotton combed/carded knitting and weaving in count range Ne 16/1 to 60/1. We can offer following yarn also:

- Organic Yarn from Ne 20/1 to 40/1 combed from Ne 20/1 to 50/1
- BCI Yarn.

All individual cones are passed through ultra violet rays for detection of shade variations.

- Count C.V % Guaranteed Less than 1.5%.
- Imperfections to match the highest Uster standards.
- Cone Angles 5°57' / 3°20' / 4°30'.
- Yarn Content 1.0 kg to 2.2 kg/cone as desired.

THE USTER STATISTICS-A UNIVERSAL LANGUAGE OF QUALITY

- T.T. uses the Uster statistics as a quality benchmark, and thereby presents the merchandiser with a completely reliable standard, lot after lot.
- Fibre and Yarns are strictly monitored at every stage. Testing is carried out on the latest testing equipment like H.V.I. UT-4 and USTER-CLASSIMAT.

-Mahatma Gandhi

Our Customer Policy

A customer is the most important visitor to our Premises. He is not dependent on us. We are dependent on him. He is not an interruption on our work. He is the purpose of it. He is not an outsider on our business. He is a part of it. We are not doing him a favour by serving him. He is doing us a favour by giving us an opportunity to do so.

HIGHLIGHTS

- ISO 9001 approved quality control

ISO-9001 CONFIRMS T T QUALITY THINKING

A certified quality assurance system is mandatory to maintain discipline in the production line.

The ISO-9001 standard offers a model quality Assurance System. They offer a base on which a company can build a quality structure.

The ISO-9001 certification enables us to meet customer's wishes, needs and problems. It provides us with new ideas and suggestions for optimisation. The culture of things "WELL DONE" professionalism, customer satisfaction and the enthusiasm for our work has made us improve our quality system leading up to ISO-9001 certification.

The Company has also taken OEKO-Tex Certification to match upto European environmental standards. This further strengthens our commitment to the environment.

The company has also taken certification for BCI yarn.

We are now producing OEKO-Tex Certified Yarn

TOWARDS CONTAMINATION FREE YARN

The fusion of human brain with technology and care fully selected cotton has led to effective control of contamination in yarn.

Introduction of Contamination removing machine at Blow Room and in Winding are some of the counter measures that have been adopted to minimize contamination levels. This is apart from manual removal of contaminants.

Foreign materials such as polypropylene, hair jute etc. are distinguished from the pure textile fibers, and eliminated if the programmed tolerance limits are exceeded.

THE VISION SHIELD-FROM JOSSI-SWITZERLAND, Installed in blow room.

Contaminants like polypropylene are detected through the fluorescent effect.
